

CONTENTS.

CHAPTER I.

NUMBER.

SECTION	PAGE
1. Number is Independent of the order of Counting	3
2. A Sum is Independent of the order of Adding.	4
3. A Product is Independent of the order of Multiplying.....	7
4. The Distributive Law.....	14
5. On Powers.....	16
6. Square of $a + 1$	17
7. On Powers of $a + b$	19
8. On the Number of Arrangements of a Group of Letters..	23
9. On a Theorem concerning any Power of $a + b$	25
10. On Operations which appear to be without Meaning.....	30
11. Steps.....	32
12. Extension of the Meaning Symbols.....	35
13. Addition and Multiplication of Operations.....	37
14. Division of Operations.....	39
15. General Results of our Extension of Terms.....	41

CHAPTER II.

SPACE.

1. Boundaries take up no Room.....	43
2. Lengths can be Moved without Change.....	47
3. The Characteristics of Shape.....	50
4. The Characteristics of Surface Boundaries.....	58
5. The Plane and the Straight Line.....	61
6. Properties of Triangles.....	63
7. Properties of Circles; Related Circles and Triangles.....	69
8. The Conic Sections.....	74
9. On Surfaces of the Second Order.....	79
10. How to form Curves of the Third and Higher Orders.....	85

CONTENTS.

CHAPTER III.

QUANTITY.

1. The Measurement of Quantities.....	88
2. The Addition and Subtraction of Quantities.....	91
3. The Multiplication and Division of Quantities.....	92
4. The Arithmetical Expression of Ratios.....	94
5. The Fourth Proportional.....	98
6. Of Areas; Stretch and Squeeze.....	105
7. Of Fractions.....	107
8. Of Areas; Shear.....	111
9. Of Circles and their Areas.....	114
10. Of the Area of Sectors of Curves.....	119
11. Extension of the Conception of Area.....	121
12. On the Area of a Closed Tangle.....	124
13. On the Volumes of Space-Figures.....	126
14. On the Measurement of Angles.....	129
15. On Fractional Powers.....	131

CHAPTER IV.

POSITION.

1. All Position is Relative.....	134
2. Position may be Determined by Directed Steps.....	136
3. The Addition of Directed Steps of Vectors.....	139
4. The Addition of Vectors obeys the Commutative Law..	144
5. On Methods of Determining Position in a Plane.....	145
6. Polar Co-ordinates.....	149
7. The Trigonometrical Ratios.....	151
8. Spirals.....	152
9. The Equiangular Spiral.....	156
10. On the Nature of Logarithms.....	160

CONTENTS.

11. The Cartesian Method of Determining Position.....	164
12. Of Complex Numbers.....	170
13. On the Operation which turns a Step through a given Angle.....	174
14. Relation of the Spin to the Logarithmic Growth of Unit Step.....	177
15. On the Multiplication of Vectors.....	180
16. Another Interpretation of the Product of Two Vectors..	185
17. Position in Three-Dimensioned Space.....	187
18. On Localised Vectors or Rotors.....	190
19. On the Bending of Space.....	193

CHAPTER V.

MOTION.

1. On the Various Kinds of Motion.....	205
2. Translation and the Curve of Positions.....	207
3. Uniform Motion.....	211
4. Variable Motion.....	214
5. On the Tangent to a Curve.....	219
6. On the Determination of Variable Velocity.....	224
7. On the Method of Fluxions.....	227
8. Of the Relationship of Quantities, of Functions.....	229
9. Of Acceleration and the Hodograph.....	234
10. On the Laws of Motion.....	239
11. Of Mass and Force.....	241
